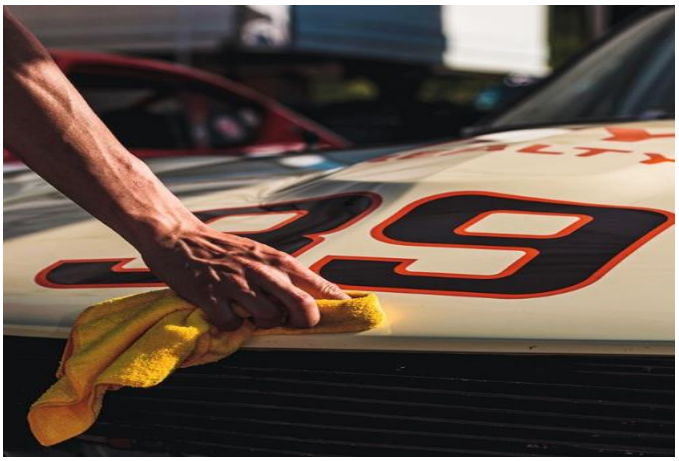
Gloss and smoothness – Care and polishing products

Dirt-repellent, hydrophobic, high gloss and slipping properties



What have shoes, floors and furnitures in common? To enhance gloss, slipping and protection, a high quality dirt- and water-repellent care and polishing product is needed containing montan wax ROMONTA N as an ideal part of the compound.

Properties

- Increased hardness for best scratch resistance (surface protection)
- Improved surface smoothness and brilliance
- Superior dirt-repellence
- Anticorrosive
- Good slipping effects
- Surface hydrophobation for dirt and moisture protection
- Chemical bonding between non- and unpolar layer
- Good paste formation
- Excellent dispersing properties due to saponifiable components
- High surface affinity

Delivery Program

- ROMONTA N

Delivery Form

- Granulate

Application

- Wax component of care and polishing products
- Manufacturing of shoe and floor polishes, furniture polishes, wood care products
- Used alone or as a compound with other care and polishing product components
- Available as both a solvent-containing and an aqueous formulation
